-------------------------------	---

DEPARTMENT OF FIRE AND RESCUE:

Mike Dmachowski was on hand to talk about DFRS. He said that they have a new chief – Chief Tom Owens. He also reminded residents to shovel out fire hydrants during a snow storm. Since spring is upon us he also reminded residents that there is no grilling on balconies and to not use your grill against your house.

He also talked about the new smoke alarms that have 10 year battery life and recommended folks switch over to those.

GUEST SPEAKER:

Jenny Willoughby – City of Frederick Sustainability Manager 301-600-2843

Jenny was on hand to talk about the sustainability plan for The City of Frederick. Frederick is committed to sustainability for everyone who lives, works, and plays in the City. With participation from businesses, residents, and government, we will create a City that is resilient at its core and periphery and will become a sustainability model for the region.

This plan is the City’s framework to tackle challenges and prioritize policies and actions that will guide Frederick toward a more sustainable future. The policies and actions suggested in this plan will help the City provide access to transportation, healthy food, educational and cultural resources, green spaces, clean air and water to residents and businesses.

What is sustainability?

Sustainability means maintaining balance between economic, social, and ecological needs for today and for future generations. Each of these will be addressed within the eight sectors of this plan. Sustainable choices today will help facilitate healthy residents, healthy communities, and a healthy environment now and into the future.

What does sustainability mean for you?

A sustainable city benefits everyone by providing better transportation, buildings, neighborhoods, parks, and healthy places to work and live. The City is working toward becoming a more sustainable community by:

- Supporting a strong, local economy with better access to jobs, services, and amenities
- Encouraging healthier lifestyles by providing alternative transportation options and access to nutritious food choices
- Leading the way in more efficient and renewable energy and fuels to reduce costs and our carbon footprint
- Protecting water quality and green spaces while encouraging smart development
- Designing communities such that all levels of income are supported with adequate services and amenities

How do we make it happen?

We can achieve sustainability through a collaborative process. Each of us plays an important part in creating and maintaining a sustainable Frederick. The City government is leading this effort, and residents and private businesses also are essential to achieving these goals. By building partnerships with various committees, interest groups, local and state government, and within City departments, sustainable ideas and actions will filter through projects on every level. This plan outlines actions and policies that could help each of us to become part of the sustainability solution. This Sustainability Master Plan will be evaluated every two years.

OLD BUSINESS:

- NAC 10 Facebook Page- Please “like” our page - City of Frederick NAC10

NEW BUSINESS:

- Concern about sharrow signs coming up – when it was snowing plows distributed chunks of the paint into yards and concern of the mess as well as what happens if hit by a lawn mower. Information sent over to Devon Hahn and Tim Davis of the City of Frederick.
